VigiFlow release 15 May 2024

What's new?
A few small, but significant improvements.

Improved layout of generated PDFs
- The PDF generation has been improved to provide better readability.
- Larger font size and adjusted background colors in headers were added.
- Table columns widths were adjusted to better fit the content.
- Table rendering was improved with emphasis on page brakes where priority is to avoid breaking both tables and rows.
- A defect was fixed that in some cases prevented PDF generation of cells containing very long texts.

Reports sent via eReporting from Brazil are mapped to Brazilian Portuguese MedDRA
Reports coming to VigiFlow from any of the eReporting applications (via Submission API) where the reaction language is Portuguese, and the reporter country is Brazil are now mapped according to the Brazilian Portuguese MedDRA.

Manage Authority
Save button now follows the scroll and is visible no matter where on the page the user is.

List all users button was replaced with *All users* tab.

VigiFlow for AEFI
Nullified reports are excluded from VigiFlow for AEFI graphs.
