New VigiFlow
Release 1.8.2
August 2019
Report list
New column

Initial received date has been added to Report list

The report list can be sorted by Initial received date by using the arrows
New assessment method
French method has been added as a new causality assessment method. When French method is selected, these values can be used.
Import of E2B-xml files
If *Patient Initial* is UNKNOWN or PRIVACY when importing an E2B(R2) file, the report is accepted and the values are saved as nullflavors.

Nullflavors are not yet implemented in the GUI so these values are not shown when looking at the reports in Data Entry.

```xml
<patientinitial>PRIVACY</patientinitial>
<patientinitial>UNKNOWN</patientinitial>
```
Import – acknowledgement message

The R2 acklog has been modified to include:

- **Encoding**
  - `<xml version="1.0" encoding="UTF-8"/>

- **Doctype element**

- **Authoritynumb and Companynumb**
  - `<authoritynumb>SE-ZZZ-TESTFLOOW</authoritynumb>
  - `<companynumb/>

- **Receiptdate**
  - `<receiptdate>20150302</receiptdate>

- **Errormessagecomment**
  - `<errormessagecomment>Patient identification missing.</errormessagecomment>`
